DETAILED ACTION

Amendment

1. Receipt is acknowledged of the amendment filed 4 April 2007.

Response to Election/Restriction

2. Applicant's election with traverse of Group I, claims 1-11, in the reply filed on 21 December 2006 is acknowledged. Claims 12-22 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention. Election was made with traverse in the reply filed on 21 December 2006. In response to applicant's arguments that the restriction is improper examiner respectfully disagrees and submits that the search for the apparatus for examining the documents provided with optically effective diffraction elements would be a burden on the examiner. It is respectfully submitted that the security element can indeed be read by an apparatus other than the apparatus which is characterized by the capacitively operating scanner, and that the scanner is able to examine other security documents with varied optically effective diffraction security elements.

Ex-Parte Quayle Action

3. This application is in condition for allowance except for the following formal matters:

In the claims:

The election of the claims 1-11 was made with traverse. In order to pass to allowance, claims 12-22 must be cancelled.

Application/Control Number:

09/485,734 Art Unit: 2876

Allowable Subject Matter

- 4. Claims 1-11 are allowed.
- 5. The following is a statement of reasons for the indication of allowable subject matter:

The best prior art of Berger et al. (U.S. Patent No. 6,165,592, from hereinafter "Berger") teaches that in the layer composite 4, an optical security feature, namely, a light reflecting or diffracting and/or refracting structure is provided which is formed for example as a thin metal layer 5 which in the embodiment of FIGS. 1 and 2, is embedded between a transparent layer 6 indicated as the uppermost layer in the layer composite 4, and an adhesive layer 7. The adhesive layer 7 serves to fix the layer composite 4 upon the surface of the document 1. The transparent layer 6 in the layer composite 4, which in the embodiment (FIG. 2) is indicated as the uppermost layer, covers the diffractive optically effective structure formed by the metal layer 5 and makes it considerably difficult to attempt to remove the structure in a counterfeiting effort (see Figure 2, col 5, lines 25-40). However, Berger fails to specifically teach that there is target oriented electrical encoding of data consisting of a discontinuous metallization layer (Berger teaches a continuous metallization layer).

Response to Arguments

6. Applicant's arguments with respect to claims 1-11 in the reply filed 20 March 2006 have been considered but are moot in view of the new ground(s) of rejection.

Examiner appreciates applicant's arguments regarding the Edwards reference.

Application/Control Number:

09/485,734 Art Unit: 2876

Conclusion

7. Prosecution on the merits is closed in accordance with the practice under *Ex* parte Quayle, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to *Lisa M. Caputo* whose telephone number is **(571) 272-2388**. The examiner can normally be reached between the hours of 8:30AM to 5:00PM Monday through Friday. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael G. Lee can be reached at **(571) 272-2398**. The fax phone number for this Group is (571) 273-8300.

Communications via Internet e-mail regarding this application, other than those under 35 U.S.C. 132 or which otherwise require a signature, may be used by the applicant and should be addressed to [lisa.caputo@uspto.gov].

All Internet e-mail communications will be made of record in the application file. PTO employees do not engage in Internet communications where there exists a possibility that sensitive information could be identified or exchanged unless the record includes a properly signed express waiver of the confidentiality requirements of 35 U.S.C. 122. This is more clearly set forth in the Interim Internet Usage Policy published in the Official Gazette of the Patent and Trademark on February 25, 1997 at 1195 OG 89.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
